New Release

A New Look for Tuttnauer Automatic Autoclave Line

The New Automatic Autoclave

The Old Automatic Autoclave

We are happy to announce the new look of the Tuttnauer tabletop automatic autoclave line. We redesigned our autoclaves, in order that our exterior should reflect our interior. The new design compliments our proven safety, durability and efficiency features. We are confident you'll like the results.

As our valued partner, we would like to share with you our thoughts, behind the redesign. The new design's harmonious and contemporary look makes the autoclave pleasant to use in today's modern clinic. Some of the changes include:

- **Streamlined door cover and panel design** for a smooth and stylish look.
- **The Control Panel** - Soft lines complimented by cool blue tones, create a fresh look.
- **The Tuttnauer logo** was moved to the top right corner of the door to strengthen our brand presence.
- **The model name** was redesigned to match the door and panel look and feel and is situated on the bottom left corner.
- **The LCD Display** color was changed to blue, ensuring that the data is easy to read.
- **Sharper and brighter indicator lights**

The redesign was applied to our entire automatic autoclave range. Models with chamber sizes of 19 L. to 23 L/ received a new panel and door cover design. The larger models ,ranging in chamber sizes from 34 L. to 85 L .,and the compact 7.5 L .model, received a new panel design,while the door cover was not changed.

The following list details the redesign according to models:

- The 1730 EK model received a new panel design
- The 2340,2540 E/EA/EK/EKA line received a new panel design and a new door cover
- The 3140 E received a new panel design
- The 3850,3870 E/EA line received a new panel design

We feel at Tuttnauer that our new design reflects our position as technology leaders and represents a clear vision and a bright future.
